

3148

TOOL LANYARD

The Squids® 3148 Tool Lanyard is for attaching large tools up to 80 lbs // 36 kg to a fixed anchor point for prevention of heavy dropped objects. It features an extra-large double-locking carabiner on one end and a durable treaded loop on the other. This ANSI/ISEA 121-2018 certified lanyard is designed to attach large burke bars, stressing rams or mag drills directly to the jobsite on rebar or handrails. Intended for attachment to fixed anchor points, the carabiner or loop end should never be fixed to a worker's body. The captive-eye carabiner prevents webbing from working into the gate and causing it to open while in use, as well as prohibiting detachment for activities it is not rated for.

Features

- MEETS ANSI/ISEA 121-2018 – Third party certified to an 80lb // 36kg maximum working capacity with a 2:1 safety factor
- MADE FOR HEAVY TOOLS – Attach to the structure or jobsite instead of the worker
- XL DOUBLE-LOCKING CARABINER – Easily attaches to heavy drills, crow bars or handrails
- TREADED LOOP END – Gripping material securely attaches to large tools or the structure being worked on
- NON-SHOCK ABSORBING WEBBING – For safer, long-lasting use with heavier tools
- HEAVY-GAUGE NYLON STITCHING – Provides strength and durability in harsh work environments
- SINGLE-LENGTH CONSTRUCTION – Eliminates weak points seen with multi-component lanyards
- LANYARD DIMENSIONS – 76IN // 193cm
