THEY CALL ME “MELLOW YELLOW.” CAN I GET THAT?

Sure. Whatever you want. Personalization is the point. Ergodyne has a trusty and user-friendly system for personalizing the Tenacious Work Gear® you want. We increase your flair quotient using the following methods:

- Embroidery
- Screen Printing
- Pad Printing
- Heat Transfer

And the hassle of shipping newly purchased product to a logo shop is so 2009. Rest easy knowing the place you get your safety gear is the same place your logo comes from. No questionable FR embroidery fabrics or screen printed logos that wear and tear. We put the same emphasis on durability, style, and innovation with logoing as we do our top-flight products.

SO HERE'S HOW IT WORKS...

1. Submit high resolution art to orders@ergodyne.com along with product information and desired location of the logo.
2. Hold tight to receive an image of the product with the desired logo along with lead times and pricing.
3. Review image mock-up: approve or request changes.
 - a. If requesting changes, Customer Support will work with you to update the logo placement or change the logo all together!
4. If logo and product are approved, Ergodyne is off and logoing begins!

FALQS... FREQUENTLY ASKED LOGO QUESTIONS

Q. What are set up charges?

A. Set up charges are the fees associated with the time it takes to prepare the art for production.

Q. Is there a set up charge?

A. Yes, there is a set up charge on all imprinted items. Depending on the process used and quantities purchased, this may be waived on large volume and repeat orders.

Q. What is the cost?

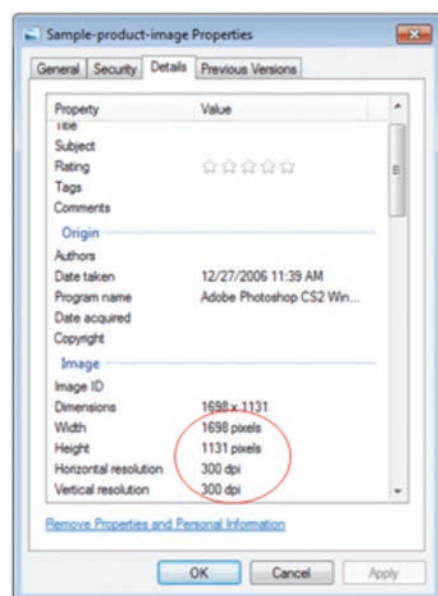

A. Pricing is provided on each upcoming product page by product model number. If you do not see the product you are looking for, call 800-225-8238 or email orders@ergodyne.com and our crackerjack staff will see what they can do!

Q. How long does the process take?

A. Embroidery and screen printing orders have a standard 3 week lead time from approval. Heat transfer orders are 2 weeks for the initial order while repeat heat transfer orders are 1 week.

Q. What are the artwork requirements?

A. Vector art or high resolution art (300DPI (dots per inch) at 5") must be provided as a jpg, eps, or ai file. To determine whether or not you have high resolution art, look at the digital file of your image.

Open your image. Click on "file" (it will give you the image properties) and look under "Details."

Q. What is high resolution art?

A. A "dot" (also known as a "pixel") describes the number of discrete points that can be captured by digital cameras. "Dots per inch" (dpi) measures the density of the image when printed. Long story short - 300DPI is considered to be high resolution art and it needs to be that or higher to be up to snuff on each product.

Q. Can I see a sample of what the product will look like?

A. A digital mock-up of what the finished product will look like will be sent for approval before proceeding with the initial order. However, a physical sample may be sent upon request for final approval.

Q. What is the MOQ?

A. MOQ = minimum order requirement. The minimum order requirement varies based on product and process. For example, high-visibility heat transfers and embroidered hat orders have an MOQ of 12.

Q. Where are the logo locations for each product?

A. Please refer to the model numbers on the following pages. These images show you where logos are able to be placed.

Please be aware, logo locations showcased on the following pages are the most popular, tried and tested options on each of our products. Please pay special attention to the logo location options on the items you are interested in logoing as these location options vary widely by product. Always note the logo location on your order to be sure it gets placed where you need it. If you have a special location request, contact our crackerjack staff at orders@ergodyne.com.
